SPD

This form recommended and approved for, but not restricted to use by, the members of the Pennsylvania Association of REALTORS® (PAR)

1 PROPERTY 690 School Street, Indiana, PA 15701

2 Seller:

3 Robin W. Reschini Qualified Personal Residence Trust

4 The Real Estate Seller Disclosure Law (68 P.S. §7301 et seq.) requires that a seller of a property must disclose to a buyer all known
5 material defects about the property being sold that are not readily observable. While the Law requires certain disclosures, this disclosure
6 statement covers common topics beyond the basic requirements of the Law in an effort to assist sellers in complying with disclosure
7 requirements and to assist buyers in evaluating the property being considered. Sellers who wish to see or use the basic disclosure form can find
8 the form on the Web site of the Pennsylvania State Real Estate Commission.

9 This Statement discloses Seller's knowledge of the condition of the property as of the date signed by Seller and is not a substitute for any
10 inspections or warranties that Buyer may wish to obtain. This Statement is not a warranty of any kind by Seller or a warranty or
11 representation by any listing real estate broker, any selling real estate broker, or their licensees. Buyer is encouraged to address concerns about
12 the conditions of the property that may not be included in this Statement. This Statement does not relieve Seller of the obligation to disclose a
13 material defect that may not be addressed on this form.

14 A Material Defect is a problem with a residential real property or any portion of it that would have a significant adverse impact on the
15 value of the property or that involves an unreasonable risk to people on the property. The fact that a structural element, system or subsystem
16 is at or beyond the end of the normal useful life of such a structural element, system or subsystem is not by itself a material defect.

INFORMATION REGARDING THE REAL ESTATE SELLER DISCLOSURE LAW

Generally speaking, the Real Estate Seller Disclosure Law requires that before an agreement of sale is signed, the seller in a residential real estate transfer must make certain disclosures regarding the property to potential buyers in a form defined by the law. A residential real estate transfer is defined as a sale, exchange, installment sales contract, lease with an option to buy, grant or other transfer of an interest in real property where **NOT LESS THAN ONE AND NOT MORE THAN FOUR RESIDENTIAL DWELLING UNITS** are involved.

The Law defines a number of exceptions where the disclosures do not have to be made:

1. Transfers that are the result of a court order.
2. Transfers to a mortgage lender that result from a buyer's default and subsequent foreclosure sales that result from default.
3. Transfers from a co-owner to one or more other co-owners.
4. Transfers made to a spouse or direct descendant.
5. Transfers between spouses that result from divorce, legal separation, or property settlement.
6. Transfers by a corporation, partnership or other association to its shareholders, partners or other equity owners as part of a plan of liquidation.
7. Transfer of a property to be demolished or converted to non-residential use.
8. Transfer of unimproved real property.
9. Transfers by a fiduciary during the administration of a decedent estate, guardianship, conservatorship or trust.
10. Transfers of new construction that has never been occupied when:
 - a. The buyer has received a one-year warranty covering the construction;
 - b. The building has been inspected for compliance with the applicable building code or, if none, a nationally recognized model building code; and
 - c. A certificate of occupancy or a certificate of code compliance has been issued for the dwelling.

In addition to these exceptions, disclosures for condominiums and cooperatives are limited to the seller's particular unit(s). Disclosures regarding common areas or facilities are not required, as those elements are already addressed in the laws that govern the resale of condominium and cooperative interests.

690 School Street

The Dining Room/Master Bedroom wall was the exterior wall of the house. Everything east is new construction. So the kitchen, breakfast area, pub, porch, dressing room and laundry (2nd floor) are all new construction 1995-96.

During the construction most of the roof was entirely rebuilt. Dormers are new. Roof is a 40 or 50 yr roof.

The bathroom at the top of the stairs, 2nd floor, was totally rebuilt in 2010. This was the original and only bathroom in the house prior to re-construction. The location of toilet, sinks, shower were all modified. All new plumbing, plaster, tile floor, etc. This bathroom was the only place where there was an issue with pipes freezing up at below zero temps. This is because this bathroom was not touched during the reconstruction so the walls were not open to add the insulation in that corner. When the bathroom was rebuilt, insulation was added.

All of the windows (pella) and doors are new. All Doors are solid oak. Schlage brass mortised locks were added.

All window, door and baseboard trim are new (95-96 construction). All of the trim was replaced with oak.

The dining room was the original garage. There are exterior wall bricks in the wall between the new kitchen and the dining room. Extra thick wall.

The original basement was unfinished. During the reconstruction, this basement was finished and a small wine cellar was added.

The stairs were sanded down and refinished. The stair railings are all new solid oak.

The formal living room fireplace originally had what looked like a railroad tie as a mantel. New decorative oak surround was handmade for fireplace, maintaining original stone work.

The fireplace was converted to natural gas. All flues were cleaned and chimneys capped to prevent entry by birds, etc.

The plaster ceilings on the 1st floor were redone; however, the plaster crown moulds are original.

Downspouts and turret roof are copper.

Lightning rods added.

A stairway was added to open up the third floor. All new wood floors, plumbing, trim, etc. on third floor.

The dormers were replaced with new construction.

The garage was originally a one car garage for the home behind the house and facing 7th street. The south wall was opened to add another bay and the second floor was added. Then a bridge was constructed to connect the garage/apartment to the house.

The library and the pub both have heated cables in the floor. The driveway also has heated cables. There is a separate furnace system for the driveway.

The security system is throughout and incorporates fire, smoke, heat, CO and all emergency contacts are made directly by the system and by sonitrol. Sonitrol comes for maintenance at least twice per year.

The phones and audio system were installed by Frank Viggianno. The phones are commercial with whole house intercom capabilities and multiple line, roll-over usage.

Electronic gates for security and access.

The pool and pool house were added 2008. The pool is salt-chlorinated and much healthier for your skin. Less chemicals required. Automatic safety cover. Pool equipment housed in basement of pool house so pool usage is more peaceful. In 2010, the pool house porch was enclosed.
